1. The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary examination report and its annexes, if any, established on the international application.
2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.
4. **REMINDER**

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices)(Article 39(1))(see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

(54) Title: TUNING APPARATUS FOR STRINGED INSTRUMENT

(57) Abstract

An apparatus is provided for tuning a stringed instrument. The apparatus includes a fulcrum tremolo (12) that is pivotable about a fulcrum axis to provide vibrato effect on the strings of the instrument. Six intonation modules (13) are mounted on the fulcrum tremolo. The intonation modules include macrotuners for raising and adjusting the tension of the strings to pitch from an untensioned condition. The apparatus further includes a global tuner (50) for simultaneously tuning all of the strings on the instrument. A one-piece folded metal base plate (220) and integral spring blade (240) operable with the fulcrum tremolo is also provided, along with a method for producing the integral base plate and spring blade. Alternatively, six bridge elements (170) provide second anchoring points so that the strings are substantially inextensible rearward of the second critical points. Macrotuner (52) are adapted to semi-headless tuners (51).
